Reasons for allowance

The following is an examiner's statement of reasons for allowance:

None of the prior art disclosed or suggested to show the particular structure and/or the particular operation recited in these claims namely: "an active integrator for integrating directly the analog input signal and a proportional current sample at a signal output upon completion of the sampling phase" in combination with "a control signal generator" as recited in claim 32; "wherein ... and Δt=(t2-t1)/2" in combination with "a control signal generator" and "an integrator" as recited in claim 35; the combination of "a first charge sampling circuit having a first active integrator", "a second charge sampling circuit having a second active integrator" and "a common control signal generator" as recited in claim 36; "a weighting-and-sampling element" in combination with "a control signal generator for controlling a first and second portion of a differential analog signal" and "an integrator" as recited in claims 38 and 47; the combination of "a common control signal generator", the details of "a first band-pass charge sampling circuit" and the details of "a second band-pass charge sampling circuit" as recited in claims 42 and 48; the details of "each respective charge sampling circuit" and "a common control signal generator" as recited in claim 44; the details of "each differential charge sampling circuit" as recited in claim 45; "an analog frequency compensating circuit" in combination with "a control signal generator" and "an integrator" as recited in claim 50; "an analog frequency compensating circuit" in combination with "a first charge sampling circuit", "a second charge sampling circuit" and "a common control signal generator" as recited in claim 51; "a digital frequency compensating circuit" in

combination with "a control signal generator" and "an integrator" as recited in claim 52; "a digital frequency compensating circuit" in combination with "a first charge sampling circuit", "a second charge sampling circuit" and "a common control signal generator" as recited in claim 53; the combination of all the method steps as recited in claims 58-58-59, 61.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to My-Trang N. Ton whose telephone number is 571-272-1754. The examiner can normally be reached on 7:00 a.m - 5:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Callahan can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
